

# Equipment Maintenance Technician

Industrial Machinery Maintenance • Preventive Maintenance • Electrical,  
Pneumatic & Hydraulic Systems

**AZ Manufacturing Inc.**, an ISO 9001:2015-certified precision sheet metal manufacturer located in Santa Ana, CA, is seeking a highly skilled **Experienced equipment maintenance professional seeking a technician position in a manufacturing or metal fabrication environment.** Skilled in maintaining, troubleshooting, and repairing high-precision industrial machinery, including CNC press brakes, laser cutters, punch turrets, hydraulic shears, motors, gears, belts, and related facility equipment.

**Pay & Benefits:** We offer competitive pay based on experience, with overtime available as production needs require. This is a full-time position with benefits that include health care and profit sharing.

## Professional Summary

- Hands-on experience supporting industrial and metalworking equipment in a production environment.
- Strong knowledge of preventive maintenance, system diagnostics, equipment calibration, and machine repair.
- Able to read blueprints, schematics, and engineering drawings to support accurate troubleshooting and repair work.
- Committed to safe work practices, including OSHA standards and Lockout/Tagout procedures.

## Core Skills

- **Preventive Maintenance:** Inspecting, cleaning, lubricating, and servicing gears, motors, belts, and production equipment to reduce downtime.
- **System Diagnostics:** Troubleshooting pneumatic, electrical, and hydraulic manufacturing systems.
- **Machine Calibration:** Adjusting metalworking tools and hydraulic equipment to meet drawing and blueprint specifications.
- **Repair & Fabrication:** Building, repairing, or modifying machine components using drills, grinders, welders, and precision tools.
- **Measurement & Inspection:** Using micrometers and other precision measuring devices to support accurate repairs and machine setup.
